Accomplished Frontend Engineer with 7+ years of expertise in developing dynamic, user-friendly web applications using React, Angular, and JavaScript. I have a strong focus on delivering high-quality code, optimizing user experience, and mentoring junior developers. As I grow in my role, I am committed to continuously evolving in my craft, aiming to integrate UI/UX design principles more deeply into my work, aligning with my long-term goal of contributing to both technical and design decisions.

Skills

Javascript
ReactJs, Redux
HTML, CSS
Angular
React Testing Library
Jest
Typescript
Storybook
Responsive Design
Web Accessibility
Figma
GraphQL
NodeJs
MongoDB

Education

Viva College
Mumbai University
B.Sc - Computer Science
2013 - 2017

The BSGD's Jr. College
State Board (High School)
HSC - Science Major
2011 - 2013

Career Summary

Upland Software - Senior Software Engineer (Frontend)
August 2023 - Present

- Currently at Upland Software, I serve as a Senior Frontend Engineer for the RightAnswers product, where my primary responsibilities include developing new features, resolving bugs, and continuously improving code quality to enhance both the product's performance and the overall user experience.
- As a Senior Engineer, I provide leadership to junior developers by conducting code reviews, distributing tasks, and offering technical guidance, thereby fostering a collaborative and efficient development environment.
- Led a critical migration project, successfully transitioning a legacy module from JSP to Angular 16, resulting in improved system performance and maintainability.
- Actively collaborated with backend and product teams, contributing to key decisions related to UI/UX to ensure cohesive and intuitive user interfaces.
- Occasionally involved in the UI design process, bringing a technical perspective to design discussions and ensuring the feasibility of design implementations.
- Technologies I utilize here: **JavaScript, ReactJS, Redux, Angular 16, HTML, CSS, JQuery, Storybook**

Coforge - Senior Software Engineer (Frontend)
October 2021 - August 2023

- At Coforge I have worked in collaboration with their client, **Goldman Sachs**, on their banking product, Marcus.
- My responsibilities encompassed collaborating with cross-functional teams, including Product Owners, Designers, and Backend Engineers to develop new features, improve existing code, fix bugs, and occasionally oversee production issues.
- Conducted code reviews, and implemented best practices to improve code quality and maintainability.

Certification

GNIIT - Software
Engineering from NIIT
2013 - 2016

- Used agile methodologies to plan, prioritize, and execute tasks within deadlines for timely feature delivery.
- Technologies I utilized here: **JavaScript, ReactJS, and Redux for development, and react-testing-library for writing test cases.**

Fractal Analytics - Frontend Engineer

February 2019 - October 2021

- I have developed user interfaces for various web applications during my time at Fractal, including Cognitive BI solutions for data analysts and management applications in the logistics domain for clients like **P&G** and **The Coca-Cola Company**.
- In one of the projects, as the sole front-end engineer, I contributed to the successful delivery of a warehouse operations application for P&G.
- Worked with charting libraries such as **AmCharts** and **Highcharts** to implement data visualization features that enhance the user experience.
- Worked on interactive features like voice input through Google's speech-to-text API and integrating physical handheld barcode scanners with the application.
- Technologies and frameworks utilized: **JavaScript, ReactJS, Redux, HTML, CSS, AntDesign, and Dash by Plotly.**

Technical Bazaar Solutions - Frontend Engineer

March 2017 - February 2019

- Developed user interfaces based on client requirements and designs, ensuring that the end product met their expectations and needs.
- Collaborated closely with the backend team to understand the structure of REST APIs and integrated them into the user interface for efficient data retrieval from the database.
- Successfully handled **real-time data updates** with rapid frequency (updating in **500ms - 1000ms** intervals) using **SignalR** technology, ensuring seamless communication and synchronization between the frontend and backend components.
- Contributed to iOS app development for a brief period, utilizing the Swift programming language.
- Technologies and frameworks utilized: **JavaScript, HTML, CSS, JQuery, AngularJS, and Bootstrap.**

Built.io - Internship

June 2016 - September 2016

- Acquired knowledge in JavaScript from industry experts and gained a comprehensive understanding of the application development process.
- Practiced by working on various sample projects that involved JavaScript, Node.js, HTML, CSS, and WebSockets. These projects enabled me to enhance my coding skills and implement complex functionality with ease.
